EDUCATION

Bihar Engineering University

2023 – 2027

B.Tech in Computer Science & Engineering | CGPA: 7.63

TECHNICAL SKILLS

Languages: Python, C++, Java, JavaScript, HTML, CSS, SQL

Libraries / Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, Chart.js

Tools & Platforms: Jupyter Notebook, Git, GitHub, VS Code, Local Storage API

Concepts: Machine Learning, Data Analysis, Exploratory Data Analysis (EDA), Responsive Web Design

PROJECTS

Student Performance Analysis & Prediction

Tech Stack: Python, Pandas, NumPy, Matplotlib, Scikit-learn, Jupyter Notebook

- Developed an ML-based system to analyze students' academic performance and predict future results based on attendance, study hours, and prior grades.
- Performed data preprocessing, cleaning, and EDA to uncover performance trends and identify at-risk students.
- Built and compared predictive models using Linear Regression and Random Forest, evaluating accuracy to select the optimal model.
- Visualized insights through interactive charts to support data-driven decision-making for educators.

SplitSmart Pro – Expense Splitter Web Application

Tech Stack: HTML, CSS, JavaScript, Chart.js, Local Storage

- Built a smart expense management app that splits bills among multiple participants and tracks balances in real time.
- Integrated Chart.js for interactive visual summaries of individual contributions and group spending trends.
- Implemented Local Storage for persistent data retention without a backend server.

Machine Learning-Based Prediction System

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Jupyter Notebook

- Designed and trained ML models to analyze datasets and generate predictions for improved decision-making.
- Evaluated multiple classification and regression algorithms to compare performance and accuracy metrics.

Personal Portfolio Website

Tech Stack: HTML, CSS, JavaScript, Responsive Design

- Designed and developed a fully responsive personal portfolio to showcase skills, projects, and certifications.

DevBuddies -- College Developer Community Platform

Tech Stack: HTML, CSS, JavaScript, Web Design

- Contributed to DevBuddies, a developer community platform for BP Mandal College of Engineering, Madhepura, built to bridge the gap between academic curriculum and industry demands.
- Designed website sections including About, Roadmaps, Projects, Community, and Blogs to support structured peer learning and collaboration.
- Helped plan a phased rollout covering club launch, roadmap study groups, open-source projects, and hackathons, and industry mentorship initiatives.

CERTIFICATIONS

- NPTEL – (May 2026)
- Artificial Intelligence – (Feb 2025)
- Introduction to IoT – (Feb 2025)
- Python Essentials 1 – (Feb 2025)
- Python 3.4.3 – (Dec 2025)
- Advanced C++ – (Dec 2024)
- Cybersecurity Essentials – (May 2024)
- Introduction to Computers – (Jul 2024)
- C Programming – (Feb 2024)

ACHIEVEMENTS & ACTIVITIES

- Team Lead – Smart India Hackathon (SIH), led a team to develop an innovative tech solution for a national-level problem statement.
- Developed real-world projects in Web Development and Machine Learning, demonstrating applied technical skills.
- Regularly practices Data Structures, Algorithms, SQL, and Aptitude for placement preparation.
- Active participant in technical workshops and seminars related to CS and IT.
- Assisted in organizing college technical events and seminars.
- Member of Coding/Technical Club; participated in college coding competitions and technical events.
- Collaborated with team members on project development and presentations.
